

## TPI     **Model 753a Refrigeration Leak Detectors.**

TPI 753a Refrigeration Leak Detector is state-of-art refrigerant leak detector capable of detecting all halogen based gases.

This model automatically detect all existing refrigerants and blends including 404A, PURON 410A & R-507.

The internal diaphragm pump & unique sensor design provide fast and reliable gas sensing.

Selectable sensitivity combined with audible and visual leak indicators will allow any service professional to pinpoint those through to find leaks even in contaminated environments.

### Specifications.

Sensor	CPI(Conductive Polymer Ionization)
sensitivity	0.1oz/yr(R22/R134a)
warming time	7 sec
sampling	internal diaphragm pump
sensor type	AIT Micro Tip
Scan Mode	High & Low sensitivity
Leak display	Buzzer & LED lamp
battery	Alkaline battery(2 ea. C)
Battery life	About 30 hours.
Response time	Instantaneous
Size	W77 x H240 x D59mm.
Weight	500g
Probe length	406mm
maker	TPI in USA

Test Products International, Inc.
